PROFESSIONAL SUMMARY

Computer Science undergraduate (B.Tech, Expected 2027) with hands-on experience in Data Modeling, Data Transformation, and PySpark batch processing. Skilled in building end-to-end ETL and data pipelines using Python, SQL, and dbt. Developed medallion-architecture data platforms incorporating automated Data Validation and cloud data workflows. Seeking an entry-level Data Engineer role in India.

SKILLS

Languages: Python, SQL
Data Processing: Pandas, NumPy, PySpark (Apache Spark), Data Transformation, Data Validation, ETL, Data Cleaning, Data Pipelines, Batch Processing
Databases & Warehousing: PostgreSQL, Data Warehousing
Tools & Platforms: Git, GitHub Actions (CI/CD), AWS S3, Snowflake, Docker, Airflow, FAST APIs, Streamlit, Gemini API (LLM Integration)
Concepts: Data Architecture, Data Modeling, Data Visualization, REST APIs

EXPERIENCE

Full Stack Developer Intern *Oct 2025 – Jan 2026*

WebArclight Pvt. Ltd. · Remote

- Built 2 web platforms (loan origination and learning management systems) across 10+ screens using React.js and Django REST Framework in 2-week Agile sprints, delivering 15+ responsive components and cutting development time by 30 percent.

Web Development Intern *Jul 2025 – Sep 2025*

UptoSkills Pvt. Ltd. · Remote

- Built a reusable React.js resume-template component with Gemini API integration and Express.js/MongoDB Atlas backend routes, confirming clean ATS-parsing on Resume Worded and Enhancv.

PROJECT

DealSense Creator ROI Intelligence *2026*

Live Demo

- Built a YouTube creator-analytics pipeline (API v3 to ETL to Streamlit) with a z-score anomaly detector, flagging approximately 3 percent of 609 tracked creators as outliers, then added Gemini-API-powered natural-language-to-SQL querying and spend-allocation modeling.

Food AI Analytics Platform *2026*

Live Demo

- Built a food-delivery analytics pipeline (AWS S3 to Snowflake to dbt to Dockerized Airflow) with 17 dbt models and Gemini API sentiment enrichment on customer reviews, deploying an interactive dashboard covering revenue, delivery SLA, and restaurant performance.

Weather ETL Pipeline *2026*

- Deployed an automated Python ETL pipeline scheduled to run every 6 hours via GitHub Actions, with leveled logging and error handling, accumulating 64+ daily records with zero external dependencies.

EDUCATION

B.Tech in Computer Science Engineering *2023 – 2027*

GD Goenka University, Gurgaon, Haryana

ACHIEVEMENTS & CERTIFICATIONS

- **AWS Certified:** Data Engineering on AWS Foundations, AWS Training and Certification (August 2026) — View Certificate
- **Problem Solving:** Solved 150+ algorithmic problems on LeetCode and GeeksforGeeks, applying arrays, strings, hashing, bit manipulation, sliding window, two-pointer, and mathematical techniques to optimize time and space complexity.
